Big Austin-Healeys

What to watch out for on a 100/4, 100/6 or 3000 project

ENGINE, GEARBOX AND SACK AXLE

To replace the engine and gearbox some parts are unavailable and gearboxes and axle casings are hard to find. A popular conversion is the BN2 four-speed 'box into a BN1 car, but the BN2 box is now at least £5000 secondhand. A later box from a 3000 can be used with a custom bellhousing from Denis Welch (£600). The main concern with the tough, uncomplicated engines is that the original bump is still there – to help reduce noise.

SILHOUTE AND ROOF

You could buy a modern roof and replace everything off the shelf through the roof – for £210 for a 3000 Mk II Blaupunkt

Values:

| Mint | £45,000-£65,000 |
| Good | £25,000-£35,000 |
| Project | £8000-£18,000 |
